Specification Chart

AC

FUEL PUMPS AND KITS

AMERICA'S
First
and
Finest

- *AC originated the fuel pump twenty-four years ago.*
- *More than 100,000,000 AC Fuel Pumps have been built.*
- *More than 90% of all automotive vehicles were factory-equipped with AC's.*
- *More than 40,000,000 AC Pumps are now in use.*
- *AC engineers build to but one standard of quality—the highest.*

REPAIR and DIAPHRAGM KIT SPECIFICATIONS

HOW TO DETERMINE CORRECT REPAIR KIT

1. Refer to preceding Specification Section and find the Replacement Type Number of the pump listed for the make and model of the vehicle.

   NOTE: If the make and model are not known, or are not listed, proceed as follows:

   (a) Determine the 4-digit number stamped on the mounting flange of the pump and convert it to the factory Pump Number using the following formula:

TO DETERMINE FACTORY PUMP NUMBER		EXAMPLES		
Prefix with No.	These 4-Digit Numbers Stamped on Flange	No. Stamped on Pump	Add Prefix	Factory Pump No.
152	**1000 to 4000 inclusive**	**2007**	152	152**2007**
85	**5001 to 6400 inclusive**	**5693**	85	85**5693**
153	**7001 to 9999 inclusive**	**8413**	153	153**8413**

   (b) Refer to Conversion Chart, starting on Page 25, and find the Replacement Type Number.

2. Where more than one Factory Pump Number is shown for a Replacement Type Number, and where different kits are specified for these pumps, determine the Factory Pump Number of the pump on the vehicle, following the instructions outlined in (a) above. Use the kits shown for the Factory Pump Number.

Replacement Type Number	Factory Pump Number	REPAIR KITS		DIAPHRAGM KITS

FG-8	All pumps with metal fuel covers except those listed under Types FG-4, FG-5 and FG-7.
FG-12	588 9418 9549 9571
FG-13	563
VACUUM COVER GASKETS	
FG-14	All combination fuel and vacuum pumps with single center bolt in vacuum cover.
CAP SCREW GASKETS	**If pump not listed following FG-9, see notes following FG-10 and FG-11.**
FG-9	409 554 1228 1385 1444 1453 1534 1672 1773 7462 7484 7578 7626 8752
FG-10	All combination fuel and vacuum pumps with single center bolt in vacuum cover.
FG-11	All pumps with metal fuel covers except those listed under Type FG-9.

CONVERSION CHART
FACTORY PUMP NUMBER TO REPLACEMENT TYPE NUMBER

HOW TO CONVERT FACTORY PUMP NUMBER TO REPLACEMENT TYPE NUMBER

This Chart lists complete Factory Pump Numbers numerically and corresponding Replacement Type Numbers. Practically all AC pumps are identified by the last 4-digits of the Factory Pump Number which are stamped on the edge of the pump mounting flange*.

This part of the number is never duplicated.

The complete Factory Pump Number can be determined by using the following formula:

TO DETERMINE FACTORY PUMP NUMBER		EXAMPLES		
Prefix with No.	These 4-Digit Numbers Stamped on Flange	No. Stamped on Pump	Add Prefix	Factory Pump No.
152	**1000 to 4000 inclusive**	**2007**	152	152**2007**
85	**5001 to 6400 inclusive**	**5693**	85	85**5693**
153	**7001 to 9999 inclusive**	**8413**	153	153**8413**

Because of insufficient space on the edge of the mounting flange, some pumps have this 4-digit number stamped on the outside of the diaphragm flange or on the pump body. Others are identified by the complete Factory Pump Number only, which is cast in the pump body under the diaphragm flange.
